Summary

Highly motivated Computer Science graduate with expertise in Java, SQL, HTML, CSS, JDBC, and Hibernate. Quick learner with strong analytical skills, committed to applying technical knowledge and contributing to team success.

Technical Skills

- **Java:** OOP principles, multithreading, and exception handling.
- **SQL:** Good Knowledge of writing SQL queries. Knowledge of DDL, DML, and TCL. Good understanding of SQL concepts like Grouping, Subqueries, Functions, etc
- **HTML/CSS:** Skilled in HTML and CSS, eager to apply my knowledge in creating user-friendly and accessible web layouts as I start my career.
- **JDBC API:** Experienced in utilizing JDBC API to establish and manage database connections, optimizing performance and reliability in backend development
- **Hibernate:** Proficient in Hibernate, an ORM framework for Java that simplifies database operations by automating SQL generation and object mapping, enhancing efficiency and productivity in application development.
- **Spring Boot:** Proficient in building RESTful web applications using Spring Boot. Experience with Spring Data JPA, and integrating MySQL databases.

Education

KORM College Of Engineering, B.Tech CSE 2020–2024
CGPA: 7.9

Narayana Junior College, MPC 2018–2020
CGPA: 9.2

Nagarjuna High School 2018
CGPA: 9.8

Internships

Java Full Stack Developer, Adiverse Technologies, Hyderabad May–Jul 2023

Full Stack Developer, IIDT Blackbucks Jan–Mar 2024

Certifications

- HackerRank – Java (Basic)
- HackerRank – SQL (Basic)
- Adiverse Technologies – Java Full Stack
- JSpiders – Java Full Stack Developer

Projects

Ecommerce Website (Spring Boot)

Bakery site with Admin, Shop, and User modules. Includes product management, auth, MySQL, Thymeleaf.

Library Management System (Spring Boot)

Book/transaction manager with REST APIs and MySQL backend.

Product Merchant App (Hibernate)

CRUD app to manage products/orders using Hibernate and MySQL.

Declaration

I confirm that the above details are accurate and true to the best of my knowledge.
